DETAILED ACTION

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9,10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "substantially similar" in claims 9,10 is a relative term which renders the claim indefinite. The term "substantially similar" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. The term "substantially similar" is defined in specification.

Claims 9,10 are rejected for referring to Figure I and Figure III in the specification. Claims 9, 10 are incomplete since Figure I and Figure III are not in the claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2,12-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hu (USPN 6132740; 10/17/00). Hu teaches the compound 4-cyclopentyl resorcinol. See abstract, column 2 line 38 – column 3 line 12. Hu teaches that the 4-

Art Unit: 1616

cyclopentyl resorcinol can be combined with a pharmaceutically acceptable diluent. See column 9 lines 32-40. Hu teaches a method of applying a composition comprising 4-cyclopentyl resorcinol to the skin for the purpose of lightening the skin or reducing the pigmentation of the skin. See column 3 lines 45 – 57. Hu teaches the workup required to purify 4-cyclopentyl resorcinol involves acidifying the crude 4-cyclopentyl resorcinol with aqueous acidic acid and then combining the crude 4-cyclopentyl resorcinol with ethyl acetate/petroleum ether to give 4-cyclopentyl resorcinol as a white solid. See columns 10-11 Examples 1-2. Hu does not teach 4-cyclopentyl resorcinol in monohydrate form. However, since the work-up requires aqueous hydrochloric acid, it is obvious that 4-cyclopentyl resorcinol would have been associated with water and possibly exist in the monohydrate form. In the absence of unexpected results, Examiner takes the position that ethyl acetate/petroleum is a solvent system suitable for recrystallization and that the solid product produced can comprise polymorph crystals.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-15 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-15 of copending Application No. 10/848656. This is a

Art Unit: 1616

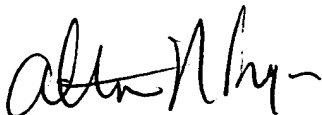

provisional double patenting rejection since the conflicting claims have not in fact been patented. The claims in USAN '656 and USAN '078 are identical in scope.
